PROFESSIONAL SUMMARY

Motivated Computer Science student specializing in Software Engineering with a strong academic record (CGPA: 9.94). Passionate about coding, UI/UX design, and building impactful real-world projects. Seeking opportunities to apply technical knowledge while continuously learning and growing in the field of software development and emerging technologies.

EDUCATION

SRM Institute of Science and Technology, Chennai, Tamil Nadu *Expected Graduation: June 2028*

B.Tech in Computer Science and Engineering with specialization in Software Engineering

- **Concentrations:** Artificial Intelligence & Data Science, Operating Systems, UI/UX Engineering
- **CGPA:** 9.94/10

SKILLS

Programming Languages: Python, C, C++, Java (Basic)
Web Development: HTML, CSS, JavaScript
Database & Backend: SQL, JDBC, Swing
Core Concepts: Data Structures & Algorithms, Object-Oriented Programming, Operating Systems
Tools & Version Control: Git, GitHub
Design Tools: Figma

EXPERIENCE

Associate Lead of Operations – TEDxSRMIST
July 2025 – Present

- Led the operations team and managed overall event logistics.
- Handled helpdesk responsibilities and supported key requirements on the event day.
- Coordinated with different teams to ensure smooth execution of the event.

Associate Lead of Editorial – SRMKZILLA
August 2025 – Present

- Created content and captions for social media and event promotions.
- Prepared content for certificates and formal communications.
- Worked with designers to maintain consistency between text and visuals.

PROJECTS

AI-Driven Dashcam-to-CarMaker Scenario Generation Pipeline with Digital Twins, SRMIST

- Developed an AI-driven project focused on converting real-world dashcam data into simulation-ready driving scenarios.
- Processed and structured real-world dashcam datasets using Python for scenario extraction and modeling.
- Implemented data transformation logic and integrate outputs with CarMaker for simulation testing.
- Validate generated scenarios within a controlled simulation environment.

BusMitra – Real-Time Bus Tracking Application (Smart India Hackathon 2025)

- Developed a GPS-based bus tracking system for live fleet monitoring.
- Built a driver-side application and an authority dashboard to manage and track vehicle movement.
- Implemented SMS-based access and offline support to improve accessibility and reliability.

AI-Powered Personal Finance Tracker

- Built a full-stack web app that parses bank statements and uses an LLM API (Groq/Llama 3) to categorize transactions and analyze spending.
- Designed a dashboard with real-time spending breakdowns and category visualizations using HTML, CSS, and JavaScript.

TravelBuddy – Local Travel Guide Website

- Designed responsive frontend pages using HTML, CSS, and JavaScript that showcased nearby tourist attractions.
- Organized content for improved user experience.

Mini Browser Games (LoveJump, Wordle: Galaxy Edition)

- Developed interactive browser-based games using HTML, CSS, and JavaScript.
- Implemented custom game logic, score tracking, and state management.
- Designed responsive UI with animations and themed visual elements.

HACKATHONS & COMPETITIONS

Smart India Hackathon – College Top 50 Shortlisted Team

- Built BusMitra as a scalable public transportation solution.

GitHub SRM – Ossome Hacks Participant

- Developed a gamified JEE practice platform with scoring and progress tracking features.

Futurix CTech – Ultron 8.0 Participant

- Built a campus utility platform displaying nearby restaurants and shopping locations.

Adobe India Hackathon – Round 1 Participant

- Solved problem-solving and Data Structures based MCQ challenges.

CERTIFICATIONS & BADGES

NPTEL Programming in Java (Elite Certificate) – October 2025

- Covered OOP principles, exception handling, collections, and application development in Java.

HackerRank Certifications – SQL, Java

- Demonstrated foundational proficiency in SQL database queries and Java programming.

100 Days of Code: The Complete Python Pro Bootcamp – Udemy

- Completed comprehensive Python training along with real world projects.

Introduction to Generative AI – Google Cloud

- Earned completion badge after finishing Google Cloud's introductory course on Generative AI concepts, applications, and real-world use cases.
